INSA Introduction

- INSA – Inland Northwest Space Alliance
- Montana Headquartered
- 501(c)(3) – Not for Profit Company
- Dedicated to Educational Advancement
INSA Current Activities

- GeneBox Launch in 2006
- GeneSat Launch Q1 2007
- Earth Station in MT
- Strategic Alliances with Key Organizations
- Sponsors the INSA Space Policy Institute
Current State

- Limited Launch Opportunities
- Uncontrollable Launch Opportunities
- Ad Hoc Coordination of Launch Opportunities
- Tertiary or Secondary Payload Only
- DoD, NASA, etc. don’t have enough launches for their own requirements
Over 80% of DoD and NASA employees will be eligible to retire within five years
Companies need educated/experienced workforce
Companies need contracts to build satellites
US Based launches for reduced travel and integration costs
Minotaur Program

- ICBM Assets (70 Peacekeeper Missiles)
- DoD Managed (RSLP)
- Orbital Sciences – Contractor
- Multiple Configurations
- Can Launch Annually or More Often
INSA Proposed Effort

- Obtain Funding
- Provide Integration
- Establish Priorities
- Acquire Secondary Payload
- Monitor/Manage Payload
- Establish Annual Funding for Launch
Needs

- Political Support
- Customer Support
- Letters to Politicians
