Ada and SPARK

• The Ada language originally issued in 1983 has been revised in 1995, 2005 and 2012

• Although originally developed at the behest of the Defense Department, Ada has taken over the niche for very high integrity software, as SIGAda says: “When the software really has to work”

• As a result, Ada is used in all commercial airline avionics and all air traffic control systems worldwide, as well as high speed trains and nuclear power plants in Europe

Control Software

• Control Software written in SPARK/Ada using Adacore’s GNAT Programming Studio & GNAT Pro compiler
• Praxis’ SPARK Toolset used to prove the correctness of the code
• Sofcheck’s AdaMagic compiles it to produce ANSI C intermediate code
• C code compiled to object code
• Software runs on CubeSat Kit MSP430 CPU
procedure Matrix_2 (J : in Natural)
  --# global in out Upper_Matrix; in In_Matrix, Diagonal;
  --# derives Upper_Matrix from Upper_Matrix, J, In_Matrix, Diagonal;
  --# pre J >= Diagonal'First and J < Diagonal'Last and
  --# Upper_Matrix'First(1) = Upper_Matrix'First(2) and
  --# Upper_Matrix'Last (1) = Upper_Matrix'Last (2) and
  --# Diagonal'First    = Upper_Matrix'First(1) and
  --# Diagonal'Last     = Upper_Matrix'Last (1);
  is

end Get_From_Radio;
Navigation Components

• Converting the NASA Goddard GEONS navigation system to SPARK/Ada yields about 1% of the error rate of C software

• This process has already found a number of errors in the NASA GEONS software

• The GEONS software runs on the GPS board ARM processor

• Celestial navigation camera

• Novatel GPS on University of Michigan Position and Time Board

• Passive magnetic attitude control

• Inertial measurement unit (3 axis magnetometer, gyro and accelerometer)
NASA Launch Opportunity

• NASA’s 2010 CubeSat Launch Initiative

• Our project was in the first group selected for launch

• Our single-unit CubeSat will be launched as part of NASA’s ELaNa IV on an Air Force Minotaur 1 flight in September 2013 to a 500 km altitude, 40.5° inclination orbit

• It will test the Lunar navigation system in Low Earth Orbit

• Follow our project at www.cubesatlab.org
NASA Launch Opportunity
Minotaur 1 – Wallops Island

First two stages are Minuteman II first two stages, third and fourth stages are Pegasus second and third stages
