

# AMODS

13th Annual Summer CubeSat Developers' Workshop  
6 August 2016

---

# Intelsat 28

- \$250 million for Intelsat and Convergence partners
- Lost \$310.2 million
- Intended replacement of Galaxy 11

“If something happens to an asset, we want to be able to attribute it.”

*Col. Cothren, USAF*

# RSat

# Timeline

# MBSE (Pathfinder)

- **Delivery:** Spring 2018
- **Launch:** Spring 2019
- **Mission:** MBSE is a concept validator that focuses on navigation, propulsion, optimization and basic diagnostics. It aims to confirm the viability of the CubeSat coupling and transport system that will be integral to the efficiencies offered by AMODS.

# Current Status

# RSat-P (Prototype)

- **Delivery:** February 2017
- **Launch:** June 2017 (ELaNa XIX)
- **Mission:** Demonstrate the feasibility of using CubeSats to diagnose malfunctions or failure in – and perform on orbit repairs on – conventional satellites.

# Ground Testing

# Motor Accuracy Tests

Positive Direction

Negative Direction

# Vibration Testing

# Restraint System

# Thermal Testing

# Motor Validation: BRICSat-D
