

## Solutions for Selective Radiation-Hardened Components in CubeSats

Ross Bannatyne, VORAGO Technologies  
rbannatyne@voragotech.com

## VORAGO Technologies

- Privately held fabless semiconductor company headquartered in Austin, TX
- Patented HARDSIL<sup>®</sup> foundation technology
- Focused on space technology since 2004. Commercializing technology since 2015

VORAGO Technologies, Austin, Texas.

## HARDSIL<sup>®</sup> – Technology

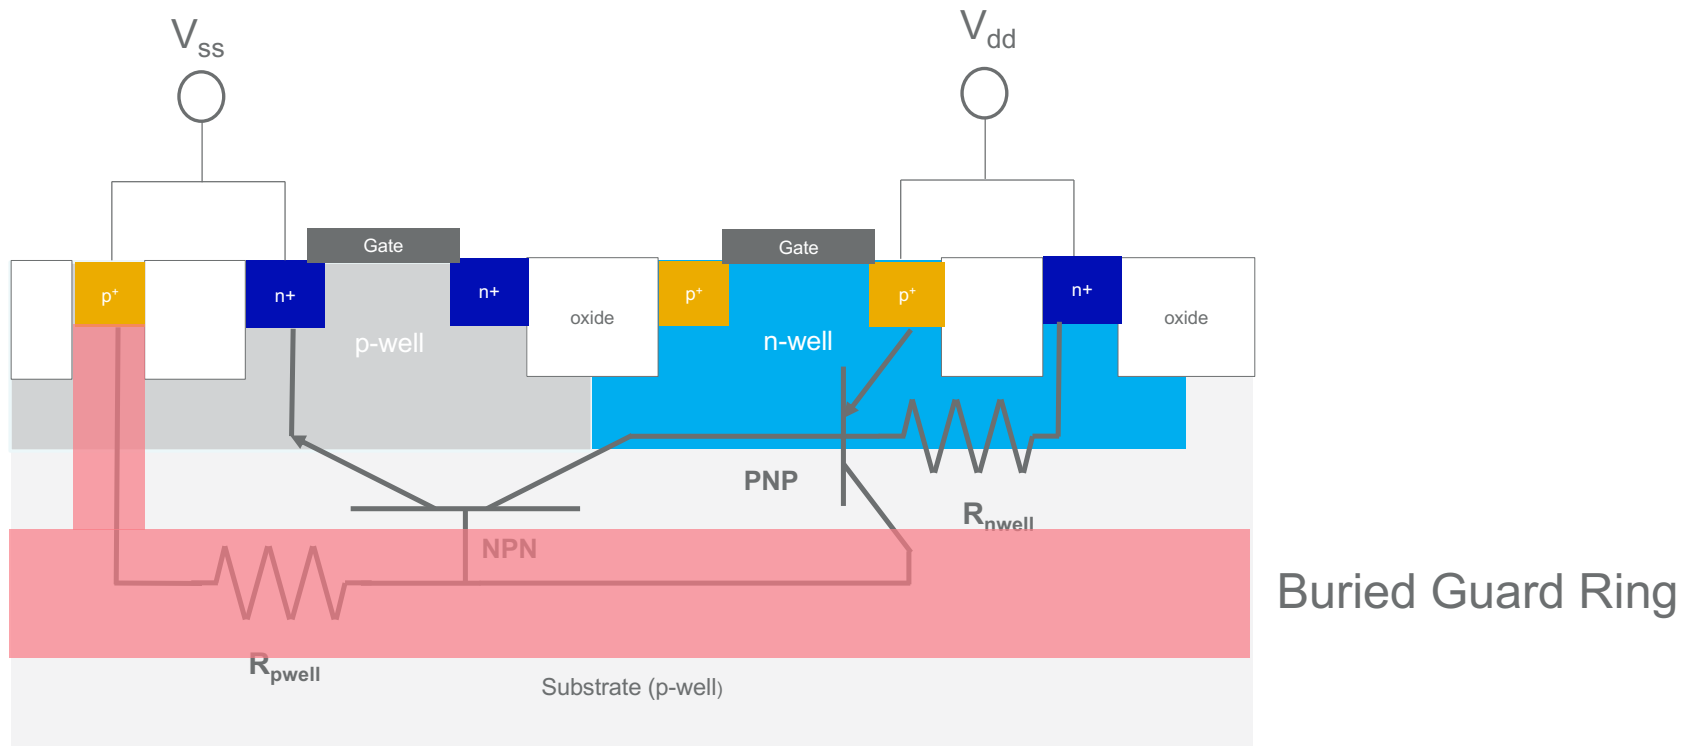

- Patented semiconductor technology (13 patents to date)
- Licensed to LSI, TI and Global Foundries
- Embedded into standard CMOS manufacturing process
  - Standard manufacturing equipment
  - Fully design agnostic
  - Enhances EOS/ESD performance
  - Eliminates latch-up
  - Improves noise floor immunity
  - Enables high temperature performance beyond 200°C
- Hardens silicon against radiation, temperature and electrical stress

## HARDSIL<sup>®</sup> – Products

- Radiation hardened portfolio up to 300k RAD
  - 8M & 16M SRAMs
  - ARM<sup>®</sup> Cortex<sup>®</sup>-M0 MCU
- High temperature portfolio 200°C
  - ARM<sup>®</sup> Cortex<sup>®</sup>-M0 MCU

## How does HARDSIL<sup>®</sup> prevent latch-up ?

HARDSIL<sup>®</sup> creates a highly conductive layer underneath the CMOS devices and wells combined with a high conductivity connection to well contacts

## How does the VA10820 deal with Single Event Upsets ?

### SEU – Memory

- EDAC (detect 2 correct 1 bit, per byte)
- Scrub Engine – programmable rate, prevents accumulated uncorrectable errors
- Layout designed to space logically adjacent bits apart
- SER – EDAC enabled –  $1e-15$  errors / bit-day\*
- HARDSIL reduces SEEs

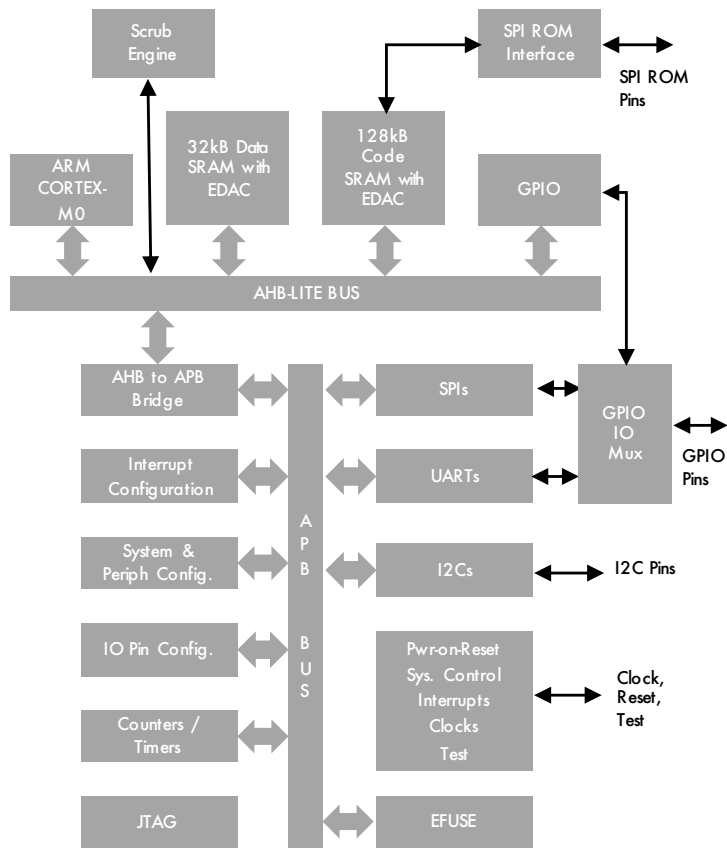

### SEU – Logic

- DICE latches
- TMR registers
- Clock glitch filters

\* At geosynchronous solar min. with 100 mils of aluminum shielding

## VA10820

### Radiation-hardened ARM® Cortex®-M0 Microcontroller

### Key Features and Advantages

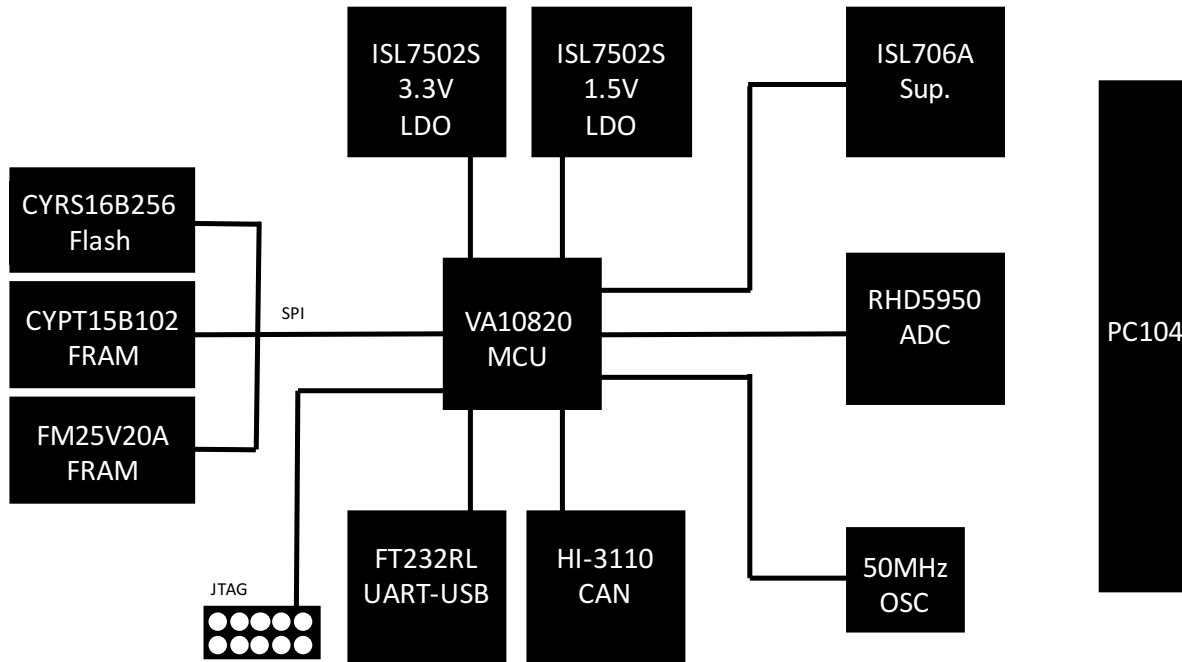

- Latch up Immune with *HARDSIL*® Hardened by Process Technology
- Power Gating and Hardware Debugger
- 32KB Data and 128KB Program Memory
- 1Kb One Time Programmable Configuration Memory (OTP)
- 24 Counter/Timers with Extensive Hardware/Software Triggering
- 3 SPI (one SPI is master only), 2 I<sup>2</sup>C, and 2 UART External Interfaces
- 56 Multiplexed General Purpose 3.3V I/O (GPIO)

### Specifications

- Total Ionizing Dose (TID) – 300K rad(Si)
- Soft Error Rate (SER) with EDAC disabled – 1.3e-7 errors/bit-day
- Soft Error Rate (SER) with EDAC enabled – 1e-15 errors/bit-day
- Linear Energy Transfer (LET) – 110 MeV-cm<sup>2</sup>/mg (at T=125C)

| Description                        | Part number        | Environment            | Temperature Range | Package          |
|------------------------------------|--------------------|------------------------|-------------------|------------------|
| Radiation-hardened microcontroller | VA10820-D0000F0PCA | Rad-hard 300K rad (Si) | -55 to 125 °C     | Die              |
| Radiation-hardened microcontroller | VA10820-CQ128F0ECA | Rad-hard 300K rad (Si) | -55 to 125 °C     | Ceramic 128 LQFP |
| Radiation-hardened microcontroller | VA10820-PQ128F0PCA | Rad-hard 300K rad (Si) | -55 to 125 °C     | Plastic 128 LQFP |

## CubeSat On Board Computer Reference Design

- Based on Pumpkin CubeSat Kit Bus
- Board available from Pumpkin
- FDK support from Bright Ascension
- Design files available from VORAGO Technologies
  - ❖ Modify original design as required (COTS v RH)

## Two Common Use-Cases for VORAGO VA10820 in CubeSats

### Standalone OBC

- Main system controller

### System Monitor / Watchdog

- Monitor FPGA and other subsystems
- Configuration of FPGA

## ARM® Cortex®-M0 is optimized for low power consumption

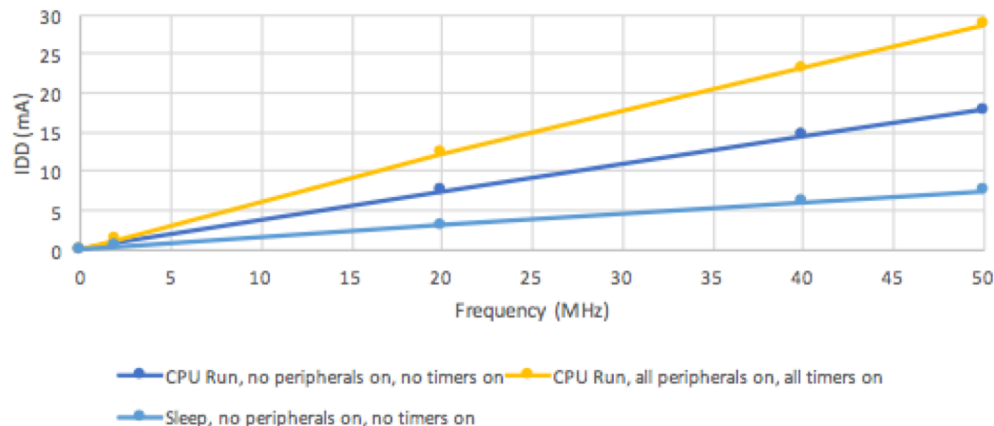

- Clock gating implemented on all peripherals
- WFI (Wait For Interrupt) instruction idles CPU
- CPU frequency can be adjusted to reduce power
- Power management Application Note available

### VA10820 MCU IDD Breakdown

- CPU + Memory Access
- Clock and always On MCU peripherals
- 24 Timers
- 2 x I2C, 3 x SPI, 2 x UART, GPIO

### VA10820 MCU Core IDD with Operating Frequency

## REB1-VA10820 Development Board

- Huge ecosystem of development tools
- All popular ARM compilers support VORAGO
- Board Support Package available
- Application notes available

|   | Supplier    | Software Development Kit            |
|---|-------------|-------------------------------------|
|   | ARM Keil    | MDK Microcontroller Development Kit |
|  | IAR Systems | IAR Embedded Workbench              |
|  | iSYSTEM     | winIDEA                             |
|   | FreeRTOS    | Real-time Operating System          |
